how to
release
software?

a talk about release workflow and make *easy* maintain projects

@Kikobeats

but first, let me put in my context

node
JS
TM

node
JS
TM

npm is the package manager for javascript.

195,397 total packages

106,306,356 downloads in the last day

560,421,246 downloads in the last week

2,384,262,763 downloads in the last month

packages people 'npm install' a lot

browserify
browser-side require() the node way

10.2.6 published 3 months ago by substack

express
Fast, unopinionated, minimalist web framework

4.13.1 published 3 months ago by dougwilson

pm2
Production process manager for Node.JS appli...

0.14.3 published 4 months ago by jshkurti

grunt-cli
The grunt command line interface.

0.1.13 published 2 years ago by tkellen

npm
a package manager for JavaScript

2.13.0 published 3 months ago by zkat

karma
Spectacular Test Runner for JavaScript.

0.13.1 published 3 months ago by dignifiedquire

bower
The browser package manager

1.4.1 published 7 months ago by sheerun

cordova
Cordova command line interface tool

5.1.1 published 4 months ago by stevegill

coffee-script
Unfancy JavaScript

1.9.3 published 5 months ago by jashkenas

gulp
The streaming build system

3.9.0 published 5 months ago by phated

forever
A simple CLI tool for ensuring that a given node...

0.14.2 published 4 months ago by indexzero

statsd
A simple, lightweight network daemon to colle...

jonschlinkert

945 Packages by jonschlinkert

360 - **v0.1.0** - The most interesting project in the world > Verb

add-banner - **v0.1.0** - Add a banner to a string. Banners are just Lo-Dash/underscore templates, if a custom one isn't defined a default will be used.

add-less-import - **v0.1.2** - Add an `@import` statement into a .less file at a specific point.

align-text - **v0.1.3** - Align the text in a string.

align-yaml - **v0.1.8** - Format, prettify, align, whatever you want to call it. This does that to YAML. Great for making long config files more readable!

alphabet - **v1.0.0** - The english alphabet as a string or array, upper and lowercase.

anchors - **v0.1.2** - Extract anchor tags from HTML and parse them into objects with useful information.

ansi-bgblack - **v0.1.1** - The color bgblack, in ansi.

ansi-bgblue - **v0.1.1** - The color bgblue, in ansi.

ansi-bgcyan - **v0.1.1** - The color bgcyan, in ansi.

ansi-bggreen - **v0.1.1** - The color bggreen, in ansi.

ansi-bgmagenta - **v0.1.1** - The color bgmagenta, in ansi.

ansi-bgred - **v0.1.1** - The color bgred, in ansi.

ansi-bgwhite - **v0.1.1** - The color bgwhite, in ansi.

ansi-bgyellow - **v0.1.1** - The color bgyellow, in ansi.

ansi-black - **v0.1.1** - The color black, in ansi.

ansi-blue - **v0.1.1** - The color blue, in ansi.
